# CLIMATE CHATS

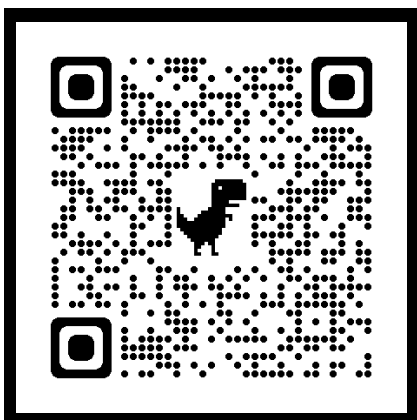

- 🌐 Do you feel disengaged from climate action?
- 🌐 Do you see the terrifying outcomes that are already happening to our neighbours and think "this is hopeless, I have no idea what to do"?
- 🌐 Do your feelings overwhelm you when talking to others about the climate emergency?

The pervasiveness of the climate emergency takes a heavy toll. Unfortunately, when we become disengaged from our feelings or allow them to overwhelm us, we start to live outside of alignment with our environmental values.

Our Climate Chats facilitator will guide you through an exploration of your big feelings to help ignite your self compassion, craft a deeper connection to each other, and tap into opportunities for taking collective action.

**SCAN ME**
